MaCICT

Modernisation of Master Curriculum in ICT for
Enhancing Student Employability (MaCICT)

DO YOU WANT TO...

- » Get unique hard and soft skills?
- » Practice team work with the students from EU and Belarus?
- » Have connections to the best companies?
- » Learn new technologies?
- » Have real experience with the SCRUM?

In May 2020 we celebrated the first common online course with ITU and Belorussian universities.

18 workgroups (7-10 students in each) got the topics from Danish and global companies, such as **IBM**, **NovoNordisk**, and **Simcorp** and collaborated actively with Product Owners from those companies during the whole term.

A major international bank, **Nordea**, sponsored the course by giving feedback to all teams, as well as the best three groups Quality Awards (10 000, 10 000, 5 000 DKK)

The best project was **Almenr Living App** developed jointly by Danish and Belorussian students.

This app is a communication platform for a new kind of housing community, e.g. to create events and services for your neighbors, arrange joint activities or rent/lent tools.

Now you have a chance to be a star!
