**WHY?**

# MASTER IN IT easy explained!

This project has been funded with support from the European Commission. This publication [communication] reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

**MaCICT**

Before, everyone wanted to be astronauts, now - programmers. Undoubtedly, the IT sphere has become the most attractive for employment in the modern labor market in most countries.

## ADVANTAGES OF IT PROFESSIONS:

1. A significant number of vacancies in the IT labor market (Web programmer, SEO marketer, SMM specialist, content manager, copywriter, link builder, link manager, web analyst, targeting specialist, front-end developer, back-end developer, embedded programmer, QA engineer, software tester, etc.) make it **easy to find a job**.
2. You are **always aware of all the news in the field of IT**, even if you are not a programmer. This means that you always have something to talk about with your friends.
3. Working in IT is often working in an international team, which means the opportunity to **visit different countries**.
4. IT companies are interested in their employees possessing modern technologies, being able to freely interact, and therefore offer their employees various ways to **improve their qualifications**, from English courses to professional trainings.
5. The IT sphere is indeed one of the leaders in terms of salaries in Belarus. This will ensure a **decent standard of living for you and your family**.
6. For work, you only need a computer connected to the Internet, and you can fulfill orders all over the world, that means have a **flexible work schedule or work remotely**.

## WORK IN IT-COMPANY FOR NON-TECHNICAL SPECIALTIES

You don't need to know how to program for working in the IT industry. In this case, you work with programmers, but do not program yourself:

**IT recruiter** is an employee who is responsible for quick search, high-quality selection and filling a vacancy.

**HR manager** is connected at the stage of adaptation of a new employee. He works with employees of the company and develops a corporate culture.

**Account manager** knows how to resolve conflicts between a client and a project manager or directly with a specialist. He also knows everything about the clients of this business and its competitors.

**Project manager** is interested in IT technologies, a special strength is organizational skills and software skills

**Game scriptwriter** creates a script based on which animations, characters and locations will be created in the future.

**3D Modeler** is a specialist who creates characters and locations in 3D.

**WHY DO YOU NEED BECAME A MASTER?**

1. Master's degree provides deeper knowledge, develops research skills and **increases your competitiveness** in the labor market.

2. Master's degree gives the opportunity to engage in scientific research, to **take part in scientific projects**, including with payment.

3. Master's degree will help you find like-minded people and start implementing your **own startup**.

4. There is a desire to **study for a master's degree, but there is no IT diploma**? No problem, you just need to pass an additional entrance exam.

5. In the magistracy, there is an opportunity to systematize the previously acquired knowledge and acquire a number of flexible skills (soft skills) within the framework of the international educational **project MACICT**.

6. Work on creating a product is combined in the magistracy with training by Belarusian and foreign teachers, **practical work with experienced employees of IT companies**, as well as the exchange of experience between teams of students.

7. By effectively acquiring soft skills, you can significantly increase your chances of getting a **job in an IT company**, where there is high competition among newcomers.

**8. Being a master is prestigious!**

## **WITHIN THE MACICT PROGRAM**

We analyzed the needs of the labor market in Belarus and introduced the most popular disciplines into the educational process

We studied the best domestic and European pedagogical practices and used them in the development of our curricula.

We have provided an opportunity to acquire flexible skills (soft skills) while studying 10 disciplines popular and in demand in the IT industry.

**We cooperate with the largest IT companies** in the region and country, such as EPAM Systems, IBA Gomel Park, iTechArt, Exadel, ANDERSEN, Godel Technologies, Neurolab, Modem, WhiteKIT, ITSupportMe, OpenMyGame, etc.
